#### Upload Document

When someone uploads document and later opens it and press Navigate back button, then it takes user to main dashboard screen rather than taking back to previous Upload documents screen

## DigiLocker Logo is not visible properly

When someone opens app (Without Login) in Dashboard (Home) section because of Slider Images Digilocker Logo is not visible properly.

 $\langle X \rangle$ 

Q

Card view not showing when searched for Aadhaar with some spelling mistakes. Eg. Aadhar, adhar, aadhaarcard

## Search Functionality

Card view not showing when searched for Driving License with some spelling mistakes. Eg. driving licence, driving lisense, driving lisense, driving licenses, drivinglicenses etc.

### Search Functionality

When searched for policy in search bar multiple result shows in horizontal slider without view all (x) button and Result is shown in horizontal card view which does not show all cards in screen.

#### Search Functionality Suggestion

1. User should get related card search result even if user entered some wrong spellings or joint spellings in search bar.

Eg. if user enters aadhaarcard in search bar then output should return with Aadhaar card box view.

2. When there are multiple result of search bar then result should be shown in vertical order with all cards visible in screen which helps user to find card easily **OR** View all (x) option should be present for multiple results.

# Thank You
